The Client hereby understands that he is fully responsible for the use of his/her own funds and accounting for the risks.

6. SLIPPAGE

The volatility in the market may create conditions where orders are difficult to execute, since the price might be many pips away due to the extreme market movement. Although the trader is looking to execute at a certain price, the market may have moved significantly, and the order would be filled at the next best price or the fair market value. Similarly, increased volume may also result in slippage if sufficient liquidity does not exist to execute all trades at the requested rate.

Once a stop is triggered, it becomes an At Best market order, and there is no guarantee it will be filled at any particular given price. Therefore, stop orders may incur slippage depending on market conditions.

7. TRADING PLATFORM

The Client acknowledges that the only reliable source of Quotes is that of the live Server feed. The Client is warned that quotes in the Client terminal are not a reliable source of information, since the connection between the Client's terminal and the server may be disrupted at some point and some of the quotes simply may not reach the Client's terminal.

The Client acknowledges that when the Client closes the order placing/modifying/deleting window or the position opening/closing window, the instruction, which has been sent to the Server, shall not be cancelled.
